

What's your plan?

PRE-JUMP CHECK

- Chest strap done up?
- Leg straps done up?
- All handles there and in place?
- Will you re-check them before exit?
- Does the whole lift have the landing pattern confirmed?
- Everything else ready?
- Did you get that pin check too?

WILL YOU SHOWCASE THE LANDING RULES?

- Keeping eyes open under canopy
- Keep plenty of height for your last turn
- Follow the agreed landing pattern
- All land the same way in straight lines
- Share the PLA sensibly and respect everyone
- Be aware of hazards and free areas
- Stay out of danger

GENERAL

- Take note of landing zones and beer lines: questions cost nothing
- Pay attention and think, always and everywhere
- Avoid the unforgivable errors of:
 - Having no flight plan
 - Swoop turns with no 'outs'
 - Cutting people up
 - Rapid low-altitude inputs

Stay safe
